

Jacob Dolph

Web Developer

I am an experienced professional with amazing work ethic, strong communication & a passion for creating user focused responsive web applications both front end and back end.

Skills

strong organizational skill | attention to detail | work independently | excellent problem solving | ability to prioritize & time manage workload | multi task & meet deadlines | interpersonal savvy | excellent written & verbal communication | ability to make quick decisions when needed

Education

University of Utah – Professional Education Full Stack Web Development Bootcamp
Intensive 6 month Program focused on developing strong skills with the MERN stack. MongoDB, Express, React and Node.

Key Projects

The Coffee Finder

- Worked with a team and developed the JavaScript needed to make synchronous Ajax calls to create an application that found the 5 closest coffee shops to the user and gave a map and directions to the chosen coffee shop.

The Weather Dashboard

- Created a weather app that shows the current weather for a city the user searches for and saves that city for future reference.

Professional Experience

Store Manager

Starbucks Coffee Co. | November 2015 – Present

- Managing a staff of 15 people across multiple day parts in collaboration to develop ways to accomplish goals
- Planning and executing store, district, and company goals through clear communication to my team, both written and verbal
- Problem solving and making on the spot decisions during periods of high stress while keeping the best interest of the business in mind
- Created a positive learning environment by providing clear, specific, timely & respectful feedback to partners on shift to improve performance & operational success

Proficiencies

HTML5

CSS

JavaScript

Node
